Ridge, Fence, or Other Physical Feature	—	Inset Area	A
Property Line or Fence Line	—	Outside Subject Area	
Nonvisible Boundary or Feature Not Elsewhere Classified	—		

Where international, state and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking entity.

¹ A '*' following a place name indicates that the place is coextensive with a MCD; a '*' following an incorporated place name indicates that the place is also a MCD; the place name is shown in parentheses. The place name is shown in parentheses within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on tribal boundaries. In some cases, tribal census tracts do not coincide with the boundaries of the tribal lands. If tribal census tracts cross state or county boundaries, the same tribal census tract number may be assigned to both sides of the boundary and, if so, constitutes a single tribal census tract entity.

² A '*' following a block number indicates that the block number is repeated elsewhere in the block.

ENTITY TYPE: American Indian Reservation
NAME: Swinomish Reservation (4075)
ST: Washington

TOTAL SHEETS: 4 (Index 1; Parent 3; Inset 0)
